

# Safely Navigating the Crowded Skies Over The Denver Metro Area

Andy Munnis, a local area DPE, discusses the risks and challenges of flying around the Denver Metro area, particularly the intensely busy northwest segment. There are no fewer than 5 active airports contributing to aircraft volume within only a 15 nm radius in this segment. As an airline captain, airplane and helicopter CFI and an active DPE, Mr. Munnis is passionate about helping pilots operate around these airports safely. He and other north metro pilots have taken the initiative to work with pilot groups and the FAA to develop methods reducing the risk of inflight conflicts. See what is being done and learn how to fly safely over the Denver Metro area.

**Directions:** The Ramada Inn is immediately to the northeast of the Centennial airport Control Tower. Arapahoe conference room.

## A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
